Fall Trees Manually

Employment Opportunities Program (Skill Development)

This qualification has eleven employment pathways for typical operational environments of Timber Harvesting, Forest Management and Clear Fell Forests and Drill Pads:

- Advanced Chainsaw Use
- Clear Fell Drill Pads
- Removal of Forest Trees
- Plan & prepare for trimming and cutting
- Assess trees
- Use chainsaw to trim and cut trees
- Conduct operator maintenance
- Assess, plan & safely carry out tree-felling operations using a chainsaw at intermediate level

This course content:

- Planning and preparations
- Preparation of chainsaws, equipment and tools
- Maintenance of chainsaws and equipment
- Trim and cut logs or trees
- Assess site conditions and conduct tree assessments
- Tree assessment to identify structural defects and stresses in trees
- Detecting hazards and own skill level for felling trees
- Decision making and exclusion of trees due to hazardous and difficult situations
- Plan a felling sequence for individual trees and preparing surroundings including escape route
- Fell intermediate trees using cuts safely without damage to personnel, equipment and surrounding environment
- Identify and manage trees that are hung up
- Select, prepare and maintain chainsaw equipment
- Assess, plan and safely operate chainsaw equipment to fell trees
- Use tree felling techniques including scarf cutting, back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction
